12-Column Grid

Components

Utilities

By Sara Manzoor

1 Starter Template

```
<link href="bootstrap.min.css" rel="stylesheet">
<div class="container">...</div>
<script src="bootstrap.bundle.min.js"></script>
```

2 The 12-Column Grid

```
<div class="container">
  <div class="row">
    <div class="col-md-8">Main</div>
    <div class="col-md-4">Sidebar</div>
  </div>
</div>
```

How it works

- `container` centers content with padding
- `row` wraps columns; `col-*` adds up to 12 per row
- `col-md-8` = 8/12 width from medium screens up
